

BROADCAST ENGINEERING

Case Study

Since 1989 VSC Design Ltd, has been planning, designing, installing and servicing the requirements of a rapidly changing broadcasting and media industry, delivering the highest standard of engineering excellence and customer service across a variety of technology platforms.

ONSIGHT Post Production Facilities

ONSIGHT's ethos is to embrace technology, providing technical excellence enabling bespoke end-to-end solutions from camera rental and data management to editing, grading, compositing and mastering in HD, 2K, 3D and now 4K. This has all been realised at their new home, just off St.Martins Lane, London, with the helping hand of VSC Design.

technology and are London's leading supplier of 3D/HD and film production and post production facilities.

Flexible System Design

A key requirement was to have an infrastructure that could stand the test of time as new equipment comes to the market and workflows evolve. A Blackmagic Universal Videohub forms the core of the baseband SDI system allowing each suite to select the equipment they need easily from a central pool of resource.

A comprehensive network infrastructure of CAT6, CAT6A and fibre provides both flexibility and bandwidth to different areas. ONSIGHT's Lab area is unique to other post production houses as it allows their in house staff to test and develop on equipment and software with manufacturers directly.

Cutting Edge Technology

When they moved into their new premises in 2014 they called upon VSC Design for the system integration and project management of the technical installation. Having forged a successful relationship over the years VSC were ONSIGHT'S obvious choice in terms of Systems Integrators. VSC were instrumental in designing and installing, both of ONSIGHT'S previous location in Berners Street in 2004 and at their Shepperton facilities, providing the technology requirements sought by ONSIGHT.

ONSIGHT have always been at the forefront of

BROADCAST ENGINEERING

Case Study

“VSC Design moved us seamlessly into our new building; their service are second to none. They have planned, designed, installed and serviced all of ONSIGHT’s requirements since its inception and continue to provide engineering services as part of our ongoing relationship”
